The **ECONOMICAL ABOVE GROUND
CLARIFIER SYSTEM**

Designed to **SIMPLIFY EQUIPMENT AND
INSTALLATION**

Model **AGC-BS-240**

AGC-BS-240 Above Ground Clarifier

What is a Clarifier?

- A Multi-Compartment Water Cleaning Technology (usually found below ground) that traps sediment and other debris, retains free-floating oil and reduces contaminant discharge downstream

Benefits of using an Above Ground System:

- Reduced Equipment Cost
- Reduced Installation Cost
- Reduced Maintenance Cost
- May eliminate EPA and other regulatory discharge problems

Featured Highlights:

Multi Functional Operation	<ul style="list-style-type: none"> Sewer Discharge Pre-Treatment to a Wash Water Recovery System
Frame – Heavy Duty, Long Life	All Aluminum Housing
Size – Small Foot Print	24" W x 48" L X 62" T
System Housing Material	All Aluminum Housing
Sump Pump	110 VAC, 15 Amp Electric – Float Activated
Adjustable Legs	Stainless Steel
Ozonation System	Optional 115 VAC, 1 Ph, 60 Hz / Air
Tank Oil Skimmer's	Drain Valve in each Tank
Oil Coalescing	Yes. Oil Coalescers are standard in tanks 1 & 2
Continuous GPM Rating	Up to 10 GPM Maximum
Output Pressure	Gravity Flow – Pressurized Outputs are Optional
Tank Sediment Drain Valves	Manual Valves are Standard. Automated Valves are Optional
Oil Adsorption	Optional Floating Oil Pillows are Available
Sludge Collection Hopper	Optional (Consult WWP for Details)
Heavy Duty Discharge Filters	Optional (Consult WWP for Details)
Trench Drains	Optional (Consult WWP for Details)
Pit Options	Hopper Bottom and Flat Bottom Pits Optional
Pit Sludge Removal System	Optional
